## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 10, drawn to a composition, classified in class 435, subclass 189, for example.
  - II. Claims 11 - 17, drawn to a test strip, classified in class 435, subclass 25, for example.
  - III. Claim 18, drawn to a measurement system, classified in class 435, subclass 283.1, for example.
  - IV. Claims 19 - 23, drawn to a method fro detecting analyte concentration, classified in class 435, subclass 4, for example.
  - V. Claims 24 - 27, drawn to a kit, classified in class 435, subclass 26, for example.
  - VI. Claims 28 - 32, drawn to a method for stabilizing a composition, classified in class 435, subclass 188, for example.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP

Art Unit: 1651

§ 806.05(h)). In the instant case other materially different products can be used to detect analyte concentration such as antigen/antibody markers.

The inventions of groups I:II, I:III, I:V, I:VI, II:III, II:IV, II:V, II:VI, III:IV, III:V, III:VI, IV:V, IV:VI and V:VI are directed to different inventions which are not connected in design, operation, and/or effect. These methods are independent since they are not disclosed as capable of use together, they have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone.

The several inventions above are independent and distinct, each from the other. They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches (as indicated by the different classification). The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Bret Field on January 28 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth A. Davis whose telephone number is 703-308-6310. The examiner can normally be reached on M-H (7:00-4:30); altn. F (7:00-3:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn can be reached on 703-308-0196. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4242 for regular communications and 703-308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
